Art Unit: 1731

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 7-23 and 46-55 drawn to a method of cleaning feathers, classified in class 162, subclass 23.
- II. Claims 56-65, drawn to forming a combined feather and paper material, classified in class 162, subclass 143.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case Group I does not require adding a reduced paper to the reduced feather material as required by Group II and can be 100% feathers. Group II does not require the “simultaneously reducing and cleaning” of Group I and can reduce the feathers without simultaneously cleaning the feathers. The inventions therefore have different modes of operation.

Because these inventions are distinct for the reasons given above and have required a separate status in the art as shown by their different classification restriction for examination purposes as indicated is proper.
